Dikshya-Paudel

SUMMARY

Python Software Engineer with 2+ years of experience building and deploying systems across international clients. Specialized in REST API design, automation pipelines, data integration, and backend engineering using Python and Django. Experienced in delivering full-stack ERP solutions using Frappe/ERPNext across construction, logistics, ecommerce, and service industries. Proven track record working independently across time zones with strong expertise in ETL workflows, system integrations and cross-platform data synchronization.

SKILLS

Languages: Python, JavaScript, C, C++

Backend & APIs: REST API design, Python automation, ETL pipelines, data integration, background jobs

Frameworks: Django, Frappe Framework, ERPNext

Databases: MariaDB, PostgreSQL, SQL

DevOps & Tools: Git, GitHub, Docker, Linux, VSCode

Integrations: Payment gateway (Fonepay) , Biometric systems, Third-party REST APIs

EXPERIENCE

Python Software Engineer | Sajeelo Infotech | May 2026 - Jun 2026, Freelancing

- Built 3+ configurable page components in ERPNext and live publishing workflows, reducing content update time.
- Designed and deployed 10+ Python REST APIs for cross-system data synchronization and automation.
- Developed a Vehicle Management System, covering service tracking, spare parts management, billing workflows, scheduling and customer service operations.

Software Engineer (Frappe Developer) | Raindrop Inc. Pvt. Ltd. | September 2024 - April 2026, Full Time

- Developed full construction ERP from scratch with 5+ modules (LC management, procurement, labour tracking, project scheduling) across 3+ departments.
- Integrated Fonepay payment gateway via Python REST API, eliminating manual payment reconciliation for the finance team.
- Automated attendance for 50+ employees via Python biometric integration, saving ~4 hrs/week of HR manual work.

Frappe Developer | AGB Company | August 2025 - Jan 2026, Part Time, Remote

- Delivered spa/service ERP remotely across 2 time zones, built 5+ Python/JS Doctypes for booking and scheduling, reducing errors by ~40%.
- Built ecommerce module front-end in JavaScript/Frappe, supporting 100+ product listings and online ordering workflows.

EDUCATION

Bachelor of Science in Computer Science and Information Technology | Bhaktapur Multiple Campus | 2025

PROJECTS

Budget Buddy - Django Expense Tracker

- Built full-stack expense tracking app with Django, PostgreSQL, JavaScript, Chart.js, Google OAuth and data reporting pipelines. [GitHub Repository](#)

Letter of Credit Module - ERPNext / Frappe

- Built custom Python LC module managing full lifecycle (issuance, usage, LC on/off transitions) with automated validations, reducing LC tracking errors to near zero. [Github Repository](#)

Course Recommendation System

- Recommendation engine using TF-IDF vectorization and cosine similarity (Python, Pandas, NumPy) across 100+ course catalogue.
