Dikshya-Paudel

SUMMARY

ERPNext/Frappe Developer with 2 years of hands-on experience delivering ERP customizations, business workflows, REST API integrations, and database-driven solutions across construction, logistics, ecommerce, and service operations. Experienced across requirements gathering, solution design, development, testing, deployment, and post-go-live support. Strong Python and JavaScript experience building custom business logic, DocTypes, workflows, reports, and integrations in Frappe/ERPNext.

SKILLS

Languages: Python, JavaScript, C, C++

ERP: Frappe Framework, ERPNext, Odoo (learning)

Web & Backend: Django, REST API, HTML, CSS, Bootstrap, Chart.js

DB: MariaDB, PostgreSQL, SQL

Tools: Git, GitHub, Docker, Linux, VSCode

Integrations: Fonepay payment gateway, Biometric systems, Third-party REST APIs

EXPERIENCE

Frappe Developer | Sajeelo Infotech | May 2026 - Jun 2026, Freelancing

- Gathered requirements from stakeholders and delivered 3+ configurable page components(Python/Frappe) and live publishing workflows, reducing content update time.
- Build 7+ Python-based REST APIs and JavaScript driven synchronization pipelines, cutting manual cross-system data entry by ~70%
- Developed a Vehicle Management System, covering service tracking, spare parts management, billing workflows, scheduling and customer service operations.

Frappe Developer | Raindrop Inc. Pvt. Ltd. | September 2024 - April 2026, Full Time

- Led the full ERPNext implementation lifecycle from requirements gathering and solution design through development, testing, deployment, and go-live support across procurement, Letter of Credit, labour tracking, and project management modules.
- Integrated Fonepay payment gateway via Python REST API, eliminating manual payment reconciliation for the finance team.
- Integrated biometric hardware with ERPNext to automatically synchronize attendance data for 50+ employees.

Frappe Developer | AGB Company | August 2025 - Jan 2026, Part Time, Remote

- Analyzed business requirements and delivered spa/service ERP remotely across 2 time zones; build 5+ Python/Js DocTypes for booking and scheduling, reducing errors by ~40%
- Built ecommerce module front-end in JavaScript/Frappe, supporting 100+ product listings and online ordering workflows.

EDUCATION

Bachelor of Science in Computer Science and Information Technology | Bhaktapur Multiple Campus | 2025

PROJECTS

Letter of Credit Module - ERPNext / Frappe

- Built custom Python LC module managing full lifecycle (issuance, usage, LC on/off transitions) with automated validations, reducing LC tracking errors to near zero. [Github Repository](#)

SnapLedger - AI Powered Receipt Intelligence API

- Built a FastAPI API that uses Gemini Vision to extract structured data from receipt images.
- Implemented Redis/arq background processing to asynchronously process receipts and store normalized data. [Github Repository](#)
